## THE BEST BEAUTY DOCS

### Gerald Imber

NEW YORK—PRESBYTERIAN  
HOSPITAL

**G**ERALD IMBER HAS HAD an active cosmetic-surgery practice for close to 30 years and has written two popular books on plastic surgery, *The Youth Corridor* and *For Men Only*. He was one of the first plastic surgeons to build an operating room in his office, a practice that's now de rigueur. He's credited with developing the popular limited-incision face-lift technique (LIFT), a version of the short-scar face-lift, which saves a woman's hairline and leaves no telltale scar behind the ear. He also is known for his neck-lifts on men and is a proponent of harvesting a patient's own fat to plump lines. He's a former polo player, which may explain why he's a favorite with European socialites. 1009 Fifth Avenue, at 82nd Street (212-472-1800)
